DEPARTMENT OF PUBLIC HEALTH,
REGINA, *December 31, 1944.*

TO HIS HONOUR,
ARCHIBALD PETER McNAB,
Lieutenant Governor of Saskatchewan.

MAY IT PLEASE YOUR HONOUR,—

I beg to present herewith for your consideration the annual reports of the Department of Public Health and the Registrar General for the calendar year 1943.

Respectfully submitted.

T. C. DOUGLAS,
Minister of Public Health.

DEPARTMENT OF PUBLIC HEALTH,
REGINA, *December 31, 1944.*

HONOURABLE T. C. DOUGLAS,
Minister of Public Health.

Sir,—

I have the honour to forward herewith the annual reports of the Department of Public Health and the Registrar General for the calendar year 1943.

Respectfully submitted.

R. O. DAVISON, M.D.,
Deputy Minister and Registrar General.

Thirty-Fourth Annual Public Health Report

INCLUDING VITAL STATISTICS

1943

Council of Public Health

The twenty-sixth meeting of the Council of Public Health was held on February 3, 1943 in Room 330, Legislative Building, Regina, at which the following members were present:

A. Wilson, M.D., Saskatoon.
R. G. Ferguson, M.D., Fort San.
W. W. Tyerman, M.D., Milestone.
J. S. Fulton, D.V.S., Saskatoon.
R. O. Davison, M.D., Regina, Chairman.

The following is a brief report of the proceedings:

The meeting recommended to have Regulations Governing Barber Shops altered by inserting in the certificate required by the Regulations the following words:

“and shows evidence of recent immunity to smallpox, scarlet fever and diphtheria.”

It was decided not to recommend similar provisions in connection with the certificate required under the regulations governing food handlers at least for one year and until the medical health officers of the cities of the Province were called in to discuss the matter.

The council, by resolution, recommended that students entering the normal schools of the Province be required to be immunized from smallpox, diphtheria and scarlet fever.

In connection with regulations governing hospitals, the Council recommended that where live steam was used, hospitals should be required to utilize a standard dishwashing sterilizing machine. Every hospital should be required to use pasteurized milk exclusively for staff and patients, where a pasteurizing plant was located in the town or village where the hospital was situated.

LEGISLATION: STATUTES OF 1944

The Public Health Act was amended by providing that regulations may be promulgated governing nursing homes, maternity homes, convalescent homes, private hospitals, homes for children and homes for the aged and infirm.

The Marriage Act was amended providing that a married person who alleges that reasonable grounds exist for supposing that the other party to the marriage is dead, may present a petition to the Court of the King's Bench to have it presumed that the other party is dead, and the court, if satisfied that such reasonable grounds exist, may make a declaration of presumption of death. Satisfactory evidence to the Court that an absence of seven years or upwards shall be deemed sufficient evidence in support of the petition.

The Saskatchewan Health Insurance Act set out the procedure for the establishment of a Health Insurance scheme for the Province.

The Physical Fitness Act made provision for the establishment of a physical fitness program in the Province, in conjunction with the program established under the National Physical Fitness Act (Canada).

The Hospitals Act was amended empowering the Lieutenant Governor in Council to make regulations governing hospitals in a much wider sense.

The Union Hospital Act was amended enabling local improvement districts or any part thereof to be added to a Union Hospital district.

REGULATIONS PASSED IN 1943

- Regulations respecting the relief of destitution.
- Regulations respecting assistance to be given to expectant mothers.
- Regulations respecting milk and certain milk products.
- Regulations governing cemeteries, care of the dead and transportation of corpses.
- Regulations governing the medical examination of certain employees in hotels and other places.
- Regulations for the sanitary control and prevention of communicable disease in sawmill, lumber, mining and construction camps.
- Regulations governing the plumbing and drainage of premises and the disposal of sewage therefrom.
- Regulations governing public hotels, boarding houses and restaurants.
- Regulations governing apartment blocks.
- Regulations governing barber shops.
- Regulations respecting the sanitary control of tourist camps.
- Regulations respecting bakeshops.
- Regulations governing sanitation.
- Regulations for the sanitary control of automobile trailer houses.
- Regulations governing fumigation with hydrocyanic acid gas.

Health Services Board

The Board was composed of Dr. D. P. Miller of Prince Albert, representing the Saskatchewan College of Physicians and Surgeons; Mr. M. S. Anderson of Bulyea, representing the Saskatchewan Association of Rural Municipalities, and Dr. R. O. Davison, Deputy Minister of Public Health, as chairman.

Municipal Bylaws and Agreements Approved.

Bylaws for the employment of municipal physicians, prepared under the municipal Acts, were approved for the town of Ogema, the village of Maidstone, R.M. 74, R.M. 226, R.M. 379, R.M. 427.

Bylaws for the employment of municipal surgeons, prepared under the municipal Acts, were approved for the village of Arborfield, R.M. 151 and R.M. 307.

Bylaws authorizing hospital care and treatment at municipal expense prepared under the municipal acts were approved for the villages of Arborfield, Hafford, Plato and Theodore. R.M. 121, R.M. 171, R.M. 244, R.M. 367 and R.M. 372.

Bylaws prepared under The Municipal Medical and Hospital Services Act were approved for the towns of Wadena and Wynyard, the village of Lampman, R.M. 34 and R.M. 35.

Agreements with municipal physicians entered into under the provisions of the municipal Acts were approved for the town of Saltcoats, the village of Preeceville, R.M. 37, R.M. 38, R.M. 70, R.M. 213, R.M. 379.

Agreements entered into with hospitals under the provisions of the municipal Acts were approved for R.M. 171, R.M. 215, R.M. 241, R.M. 243, R.M. 246, R.M. 274, R.M. 306, R.M. 397, R.M. 404, R.M. 435.

Agreements with physicians entered into under The Municipal Medical and Hospital Services Act were approved for the towns of Lumsden, Milestone, Strassbourg, villages of Bulyea, Craven, Disley, Earl Grey and Sifton. R.M. 63, R.M. 99, R.M. 125, R.M. 128, R.M. 155, R.M. 189, R.M. 219, R.M. 220 and R.M. 431.

Agreements with hospitals under The Municipal Medical and Hospital Services Act were approved for R.M. 63.

An agreement was approved between the village of Birch Hills and R.M. 460 for the provision of medical services on a joint basis under The Municipal Medical and Hospital Services Act.

The Mutual Medical and Hospital Benefit Associations Act.

During the year the Melfort and District Mutual Medical Benefit Association, Limited was incorporated.

R. O. DAVISON, M.D.,
Chairman.

Medical Relief Services

REGINA, SASK., Jan. 6, 1945.

DR. R. O. DAVISON,
Deputy Minister of Public Health.

Sir:—

I beg to submit a report of the Medical Relief Services Branch for the Relief Year 1942-43 (to August 31, 1943).

Due to improved conditions it was possible for us to considerably reduce the total cost of Medical Relief Services in comparison with Relief Year 1941-42, and the only grants continued were the subsidies paid to the physicians in the Northern Area, and the grant to the Canadian National Institute for the Blind, as well as the grant to the Victorian Order of Nurses at Regina and Saskatoon.

Medical Boards were set up in Regina and Moose Jaw for the purpose of examining relief recipients as to fitness for work with the result that a number of patients were examined, and where it was found possible were assisted towards obtaining work suitable to their physical fitness. Good results were paid by these boards, as their work was the means of the relief rolls being greatly reduced.

The supplying of insulin to diabetic sufferers, indigent responsibilities of the province, was continued, a service formerly conducted by the Canadian Red Cross Society.

Payment for medical relief services as formerly was made by this branch for the Land Utilization Cases, but the amount involved was small, as was also the amount paid by us for services to the Metis families at Lebret, under an agreement with the Oblate Fathers.

This branch of your department commenced operations on September 1, 1937 and a summary is herewith given to show the extent of our operations during the 1942-43 relief year.

Subsidies to Northern Physicians: The subsidy system in effect since May 1, 1941 was continued through the relief year 1942-43, the amount of the subsidy for each physician being determined by this office, the same varying from \$25.00 to \$200.00 per month, with mileage being granted of 10c a mile in summer and 20c a mile in winter.

The total cost for the twelve month period was \$16,914.27.

Number of Physicians	14
Average per physician per month	\$100.68

Dentists: One Dentist in Meadow Lake was paid a grant during the relief year 1942-43. Total amount for the year being \$600.00.

Dental Clinics: Repairs of plates and dentures were supplied when the department was satisfied that the patient was seriously impaired by the lack of proper plates. Total cost of dentures \$1,572.05.

Hospitals: Grants were made to the Hospital of Our Lady of the Presentation at Green Lake. Cost of which was \$1,175.35.

Victorian Order of Nurses: A monthly grant was made to the branches of the above order at Regina and Saskatoon to assist them at their work, the amount so paid was \$540.00.

Canadian National Institute for the Blind: Advances were made to the above named institution to provide examination and glasses for relief recipients. Amount advanced was \$2,300.00.

Insulin: On September 1, 1940 this branch relieved the Canadian Red Cross Society of the work of distributing insulin to diabetic persons in the province who were unable to provide themselves with the same. The amount expended was \$1,416.60.

Physicians, Examining Boards: Boards were set up in Regina and Moose Jaw for the purpose of examining relief recipients as for fitness for work. The amount expended for this service was \$360.92. This was more than offset by the saving to the Direct Relief Branch and our branch resulting from the number of people removed from the relief rolls and put to work.

Northern Areas: Medical, Dental, Hospital, Drug and Burial services were provided relief recipients and indigent persons under the Northern Settler's Re-Establishment Branch. Before payment of accounts was made, certification forms had to be signed by the relief inspector and attending physician. For indigent persons a destitute form had to be filled out by the head of the family, if the family was not on relief a demand note was signed by the head of the family and is on file here for each case. Total cost for the year, \$54,613.52.

Following I give you the figures of the expenditures for the Medical Relief Services Branch as shown by the different classifications of expenditures for the relief year 1942-43, which should serve to show how and for what purpose such expenditures were made.

Expenditures Relief Medical Services Branch

(For the Relief Year 1942-43—Sept. 1, 1942 to August 31, 1943)

Administration	\$	9685.31	
Grants :

Saskatchewan Anti-Tuberculosis League

DR. R. O. DAVISON,
SIR:—

Altogether, including surveys, clinics and sanatoria, 115,164 persons out of a population of 930,000 were examined during the year. Of these 100,656 were examined through the Seal Sale Fund, an increase of 35,077 over 1942.

During 1943, four hundred and eighty-eight new cases of tuberculosis were discovered, an increase of nineteen over 1942.

The various medical services of the League, including treatment, diagnosis, follow-up, Indian Research, examination of Normal School students, school children and nurses, when taken altogether comprise a total of 115,164 persons who had medical advice during the year. Of this number 109,782 persons were examined by the Medical Staff of the League. One hundred and ninety-one persons were examined by family physicians at the request of the League, and 5,191 Indians were examined in association with the Department of Indian Affairs and the National Research Council.

There was an increase over 1942 in persons examined by the Medical Staff of the League of 34,835, from 74,947 in 1942 to 109,782 in 1943.

The extensive fluorographic survey made in 1943 of 82,135 persons has afforded information regarding the frequency of active tuberculosis in Saskatchewan, in addition to those ill with the disease in the sanatoria. An area of twenty-five rural municipalities and four cities examined is a representative cross section of the white population of the province.

The frequency of new active tuberculosis found was 0.93 per thousand persons examined, and including previously known tuberculous persons discovered to be active at the time of the survey, the total active tuberculosis found in this area was 1.34 per thousand of the population. The rate for new active cases was lower than that found in the surveys of 1942, the rate is 0.93 per thousand as compared with 1.34 per thousand in 1942.

The benefit of these surveys are now being realized by the municipalities, and large numbers of applications have been received for this service. The policy of the League has been to give preference in this service to municipalities with higher than average death rates. By this selection it is considered that the Province as a whole will receive the maximum protection for the work done.

The proportion of early cases among the new cases of active pulmonary tuberculosis discovered in 1943 was as follows:

	Minimal	Pulmonary Tuberculosis	
		Mod. Advanced	Far Advanced
1942.....	51.6%	19.3%	29.1%
1943.....	54.1%	20 %	25.9%

The proportion of adult pulmonary cases under treatment in the sanatoria on December 31, 1943, who have had positive sputa since admission and would have been spreaders of infection had they not been hospitalized was as follows:

Adult pulmonary cases.....	582
Adult pulmonary cases with positive sputa.....	425 or 73%

Taking into consideration the number of active cases of tuberculosis admitted during the year, the proportion of new cases and re-admissions has changed but little, the figure for 1943 is 66.4% and 33.6% respectively.

There were 488 new cases of active tuberculosis discovered in 1943 both pulmonary and non-pulmonary, nineteen more than in the preceding year. Of the new cases of active tuberculosis discovered in 1943 one hundred and twelve or 23% were treated or observed outside the sanatorium.

The proportion of non-pulmonary new cases discovered during the past year was 13% compared with 13.2% in 1942.

During the past year 4187 persons were examined by the consultation service compared with 2542 in 1942, an increase of 1645. Of the 1733 new cases examined, fourteen or 0.81% had active tuberculosis.

During the year 3,654 review examinations of ex-patients were carried out by the various services of the League, and 169 were admitted for treatment.

During 1943 a total of 4,659 contact examinations were made compared with 4,277 in 1942, an increase of 382 or of 9%. The incidence of active disease found among the 1,929 new contacts was 2.64%, the same incidence as in 1942.

	New Cases		Review Cases		Total	
	1942	1943	1942	1943	1942	1943
Family Physicians.....	173	159	60	32	233	191
Consultants.....	487	607	982	1496	1470	2103
Clinics.....	623	446	522	538	1145	984
Sanatoria.....	796	717	633	664	1429	1381
Total.....	2079	1929	2198	2730	4277	4659

The period of treatment of the tuberculous cases in 1943 was 16.6 months.

In the fall of 1943 the Indian children in the Qu'Appelle, File Hills, Lestock, Gordon's, Crooked Lake, Round Lake, St. Phillips, Duck Lake, Delmas, Onion Lake R.C. and Onion Lake C.E. Schools were examined, a total of 1,232. Among these 1,232 children nine or 0.73% were found to have tuberculosis requiring treatment in hospitals or sanatoria.

In addition, twenty-four or 1.95% were found to have minimal tuberculosis of the lungs. These children are potential spreaders and a danger to the healthy children. They could be properly cared for in a spreaders' school while continuing their education.

Another fifty-nine children, or 4.79%, had evidence of fibrosis of the lungs, characteristic of that resulting from previous tuberculous lesions. The majority of these children will progress satisfactorily under school conditions. A few will undoubtedly relapse.

In the fall of 1943 the Normal School students at Saskatoon, Moose Jaw and Regina were examined, 1,024 in all. Two active cases of tuberculosis were discovered amongst them.

Arrangements have been made through the co-operation of the Department of Education and the teachers for the examination for tuberculosis of all teachers in the schools of Saskatchewan at the clinics of the League. The amount of tuberculosis among teachers has steadily fallen for a period of years, but there is still an occasional teacher breaking down with tuberculosis, and it is of first importance that both the teachers and the school children be protected from the disease.

Respectfully submitted,

R. G. FERGUSON,
*Director of Medical Services
 and General Superintendent.*

Division of Communicable Disease

REGINA, January 10, 1945.

DR. R. O. DAVISON,
Deputy Minister of Public Health,
Regina, Saskatchewan.

Sir:

I beg to submit the report of the Division of Communicable Disease, including Venereal Disease report, for the calendar year 1943.

Tables I to XV are as follows:

- I—The fluctuation of morbidity and mortality during 1942-1943.
- II—Monthly Distribution of communicable Disease morbidity.
- III—Diphtheria incidence—distribution by age and sex groups.
- IV—Scarlet Fever incidence—distribution by age and sex groups.
- V—Measles incidence—distribution by age and sex groups.
- VI—Whooping Cough incidence—distribution by age and sex groups.
- VII—Detailed distribution of communicable disease morbidity—alphabetically by cities, towns, villages, rural municipalities and armed forces.
- VIII—Summary of distribution of communicable disease morbidity, by cities (individual totals of each city), towns, villages and rural municipalities.
- IX—Comparative issues and costs of vaccines and sera—1939-43.
- X-XI—Trachoma.
- XII-XV—Venereal Disease.

ROUTINE

Letters received	4,746
Physicians' reports received	891
Armed Forces' reports	148
Memoranda received	77
Telegrams received	36
Letters dispatched	4,346
Memoranda dispatched	34
Telegrams dispatched	15
Parcels of vaccines and sera, drugs, etc., dispatched	2,874
Parcels of forms, bulletins, regulations, etc. dispatched	813
Statistical reports—internal—dispatched	168
Statistical reports—external—dispatched	780
Undertakers' licences issued	41
Disinterment permits issued	59

Diphtheria:

There were 41 cases of Diphtheria reported in 1943 as compared with 96 in 1942, a reduction of 55 cases. In 1943 we had the smallest number of cases ever reported. There were 7 deaths, the same number as in 1942. The months in which the cases occurred were—November, 11; December, 9; April, 5; February, June and October, 3 each; July, 2; and in January, March, May, August and September, 1 each.

Moose Jaw reported 4 cases, North Battleford 4, Prince Albert 2, Regina 1, Swift Current 1, and Yorkton 1. The cities reported 13 cases or 31.7 percent. of total. Two cases were from the armed forces.

There were 5 under 1 year; 8 cases 1-4 years; 13 cases 5-14 years; 1 case 15-19 years; 11 over 20 years; 2 not stated. 31.4 percent. were therefore under 5 years of age and 63.4 percent. under 15 years of age.

There was a reduction in the amount of antitoxin used in 1943 as follows: 1943, 13,093,000 units; 1942, 16,256,000 units making a saving of \$210.00. More immunization was done in 1943 than in 1942 as follows: 1943 for 39,872 persons; 1942 for 31,334 persons. In 1943 the use of the combined diphtheria toxoid and pertussis vaccine was commenced, and sufficient of this product for 6,069 persons was sent out. The cost of Diphtheria toxoid in 1943 was \$9,721.67 as compared with \$5,321.14 in 1942.

Measles:

This disease was fairly prevalent in 1943 when 4,345 cases were reported resulting in 26 deaths as compared with 1,590 cases and 15 deaths in 1942. Measles was most prevalent in March, 1,037 cases; April 870 cases; May, 659 cases; June, 370 cases and January, 263 cases. Fewest cases were in November, 8 cases.

3,252 cases or 74.8% occurred in cities as follows: Regina, 1,534; Moose Jaw, 686; Saskatoon, 669; Prince Albert, 114; Swift Current, 99; Yorkton, 96; North Battleford, 41; Weyburn, 13. The armed forces reported 281 cases or 6.4% of total.

Ages: 135, or 3.1% under 1 year; 1,180, or 27.11% between 1 and 5 years; 2,101, or 48.35% between 5 and 15 years; 392, or 9% between 15 and 20 years; 177 or 4.07% over 20 years and 7.73% not stated. There was 78.56%, therefore, under 15 years old.

Mumps:

There were 2,151 cases in 1943 as compared with 5,714 in 1942, a reduction of 3,563 cases. Three deaths occurred from mumps in each year. The disease became prevalent in January when 315 cases were reported, increased to 430 in February, reached a peak of 466 cases in March, decreased to 431 in April and 223 in May and 99 in June. Only 5 cases were reported in November.

One thousand two hundred and twenty nine cases or 57.1% occurred in cities as follows: Regina, 702; Prince Albert, 181; Saskatoon, 161; Moose Jaw, 92; North Battleford, 57; Yorkton, 16; Swift Current, 15; Weyburn, 5. The armed forces reported 567 or 26.3% of cases.

Scarlet Fever:

There was a small decrease in the number of Scarlet Fever cases in 1943 when 1,323 were reported as compared with 1,369 in 1942. There were only 8 deaths in 1943 in comparison with 13 in 1942. The greatest number of cases occurred in June, 187; May, 178; April, 170; March 161; December, 138; February, 111. Smallest number was in August, when 31 cases were reported.

The cities reported 686 cases or 51.8%, as follows: Regina, 242; Saskatoon, 160; Moose Jaw, 149; North Battleford, 75; Prince Albert, 39; Swift Current, 16; Yorkton, 4; Weyburn, 1. The armed forces reported 372 cases, or 28.1% of cases.

Ages: Under 1 year, 8 cases or .6%; one to four years, 93 cases or 7.03%; five to fourteen years 490 cases or 37.04%; fifteen to nineteen years, 160 cases or 12.09%; over twenty years, 172 cases or 13%; Age not stated 381 or 28.8%.

During the year, 9,696,000 units of Scarlet Fever Antitoxin were sent out as compared with 11,256,000 units in 1942. The cost of the antitoxin in 1943 was \$2,797.00 and in 1942, \$3,231.00, a saving of \$434.00. Sufficient Scarlet Fever Toxin to immunize 42,361 persons was sent out in 1943 and for 40,159 in 1942. The cost of the Scarlet Fever Toxin in 1943 was \$8,881.12 and in 1942, \$8,430.02. Scarlet Fever Dick test material for 9,040 was sent out in 1943.

Smallpox:

Four cases were reported in 1943 as compared with 5 in 1942. Two were reported in July and 2 in August. Two were reported from Watson, 1 from R.M. 340 and 1 from R.M. 370. Sufficient Smallpox Vaccine was sent out for 46,685 persons in 1943 and for 45,370 in 1942.

Typhoid Fever:

Only 14 cases were reported in 1943 with one death, and in 1942, 38 cases and 2 deaths. In 1943 the smallest number of cases on record were reported. Three cases were reported in April; 2 in July; 2 in September and 2 in November, with 1 in January, February, March, June, and December. Six cases were reported from cities as follows: Saskatoon, 4; Regina, 1; North Battleford 1. Four villages reported one each. Three Rural Municipalities reported one each and one had 2 cases. Sufficient typhoid Vaccine to protect 1,965 persons was sent out in 1943 and for 1,651, in 1942.

Whooping Cough:

Nine hundred and fifty nine cases were reported in 1943 with 21 deaths as compared with 225 cases and 29 deaths in 1942. Six hundred and forty one cases or 66.8% occurred in cities as follows: Regina, 495; Saskatoon, 60; Moose Jaw, 36; Yorkton, 31; Prince Albert, 19.

Ages: under 1 year, 71 cases or 7.36%; one to four years 351 cases or 36.5%; five to fourteen years, 394 cases or 41.08%; over 15 years, 13 cases or 1.3%; not stated, 130 cases or 13.3%.

Pertussis Vaccine for 12,209 in addition to the combined Diphtheria Toxoid and Pertussis Vaccine for 6,069 was sent out in 1943. This would be sufficient for 18,278 persons, in comparison with enough for 5,459 in 1942. One hundred and fifty cases occurred in October; 132 in September; 123 in July and 115 in December, with varying numbers in each of the other months. Fewest number, 18 occurred in January.

Tuberculosis:

Five hundred and three new cases and 250 deaths occurred in 1943 and 525 new cases with 251 deaths in 1942. The largest number of cases were reported in November, 87, and December, 80. Only 2 new cases were reported in January. One hundred and thirty four cases or 26.6% were reported from the cities, 45 from towns, 56 from villages and 260 from Rural Municipalities.

Anterior Poliomyelitis:

There were 37 cases reported in 1943 with 3 deaths as follows: January 1, March 1, August 4, September 16, October 11, November 4. There were 23 male and 14 female cases. The ages were: 5 years and under, 4M, 4F, 8, 21.6%; 6 years to 10 years, 7M, 3F, 10, 27%; 10 years to 15 years, 2M, 2F, 4, 10.8%; 16 years to 20 years, 7M, 4F, 11, 29.7%; over 20 years, 3M, 1F, 4, 10.8%. In 1942 there were 15 cases and 3 deaths.

The cases occurred as follows: 15 in September, 10—December, 6—October, 3—November and one in January, one in April and one in August.

Ten of these cases occurred in Saskatoon, one in North Battleford and one in Yorkton. One occurred in the Armed Services.

With the exception of 4 cases they resided in the northern part of the province, the above-mentioned 10 coming from Saskatoon, 3 from LeRoy, and the others scattered.

Anticipating a possible large number of cases, and in view of the fact that the Kenny treatment was being used with success, the Department sent two of the Public Health Nurses to Chicago early in the spring to learn the Kenny technique and also the Director of the Communicable Disease Division to Minneapolis to take the short course in Kenny treatment.

In August arrangements were made to open a Poliomyelitis clinic at St. Paul's Hospital, Saskatoon, where the Kenny treatment was made available to polio cases at the expense of the Government. Hospitalization charges were paid by the government for the clinic cases. The services of the Public Health nurses who had taken the course at Chicago were made available to direct the hot pack treatment, and Dr. Hart of Saskatoon was appointed to supervise the medical care. A Physiotherapist was also provided by the Hospital.

Between August 29/43 and November 8/43— 27 cases were admitted to the clinic. One was a member of the armed services and he was shortly removed to Winnipeg, so that 26 cases were given treatment.

One case was admitted to the clinic in August 1943, 8 in September, 15 in October and 3 in November. There were 18 male and 9 female cases admitted. Under 5 years there were 3 male and 2 female, from 6 to 10 years there were 5 male and 1 female, from 11 to 15 years there were 1 male and 2 female, from 16 to 20 years there were 8 male and 2 female. There was one age 26 male, one 27 female and one 35 male. Two required Iron Lung treatment and one of these, the male 35 years old, died within one week after admission. By the end of the year, two were discharged well, one had died and one (the armed forces) was transferred to Deer Lodge, Winnipeg.

The lower limbs (especially the right limb) were involved in 20 cases. In 3 cases the arm was involved, one bulbar, one chest, one back. From August 29, 1943 to December 31, 1943, these patients had 1,971 days hospitalization. One of the cases was pregnant 3 months when admitted.

Influenza accounted for 369 cases and 171 deaths in 1943 and 132 cases with 84 deaths in 1942. One hundred and seventy-two cases occurred in March and 108 in December. Twenty-nine cases were in cities, 20 in villages and 261 in Rural districts. Fifty-nine were reported from the Armed Services.

German Measles:

Two hundred and fifty five cases reported in 1943 and 487 in 1942. Most cases occurred as follows: June, 50; December, 48; May, 48; December, 42; and April 25. One hundred and fifty five cases were reported from cities. Thirty three were reported by the Armed Forces.

Encephalomyelitis:

Only 7 cases were reported in 1943 and 18 in 1942. Moose Jaw and Yorkton each reported one case.

Chickenpox:

Two thousand one hundred and thirteen cases were reported in 1943 and 1,890 in 1942. The greatest number was reported in December, 534; November, 395; January, 181; February, 170; June, 167; July, 153; October, 147; April, 110.

Trachoma:

Only 5 new cases were reported in 1943 and 3 in 1942.

GENERAL

During 1943, 12,569 cases of various communicable diseases were reported with 949 deaths as compared with 12,555 cases and 835 deaths in 1942.

There were decreases in the following cases reported: Diphtheria, 55 cases less; Mumps, 3,563 cases less; Scarlet Fever, 46 cases less; Smallpox, 1 case less; Typhoid, 24 cases less; Encephalitis Lethargica, 8 cases less; Encephalomyelitis, 11 cases less; Rubella, 232 cases less, Tuberculosis, 22 cases less.

The following diseases showed an increase: Measles, 2,755 cases more; Whooping cough, 734 cases more, Poliomyelitis, 22 cases more; Influenza, 237 cases more, Pneumonia, 26 cases more.

The increase in deaths of 114 was due largely to Influenza, 87 and Pneumonia, 24.

The greatest number of communicable disease cases occurred in March, 2,017, during which month 1,037 cases of measles developed. In April 1,752 cases. In February 1,639 cases, in May 1,343 cases and in December 1,338 cases. Least number of cases were reported in August, 300. Seventy nine percent. of the communicable disease was due to Chickenpox, Mumps, Measles and Scarlet Fever, as these accounted for 9,932 cases. The cities accounted for 62.82%, Towns 6.64%, Villages 3.9% and Rural Municipalities 15.67%. The Armed Forces accounted for 10.98% of all communicable diseases. In the armed forces there were 281 cases of measles, 567 of mumps and 372 of scarlet fever, making a total of 1,220 or 88.4% of their cases.

Biologicals costing \$33,190.23 were distributed free to Doctors and Hospitals in 1943, an increase of \$7,262.18 over 1942.

Respectfully submitted,

F. C. MIDDLETON, M.D., D.P.H.,
Director.

Venereal Disease

Gonorrhoea:

In 1943 there was an increase of 398 cases of gonorrhoea reported from 1942, the totals being 1943—978 cases, 1942—580 cases an increase of 68.6%. The increase in male cases was from 431 in 1942 to 705 in 1943, or an increase of 274 cases, being 63.6%. The increase in female cases was from 149 in 1942 to 273 in 1943, or an increase of 124 cases, being 83.1% increase in female cases.

In the clinics the number of cases reported was: in 1943—357 (157 male 200 female) and in 1942—240 (128 male, 112 female), an increase of 117 cases, or 49.7%. The reduction in 1942 from 1941 was 41.7%. The decrease in male patients at the clinics in 1942 as compared with 1941 was 110 or 48.1%; the reduction in female cases at the clinics was 53 or 32.1%.

The following gonorrhoea cases were reported in 1943:

	By Physicians	Clinics	Armed Forces	Total
Male.....	101	157	447	705
Female.....	64	200	9	273
Total.....	165	357	456	978

The male cases of gonorrhoea in 1943 in the armed forces were 63.4% of the total male cases, as compared with 61% in 1942.

The gonorrhoea treatments given at the clinics in 1943 were 10,510 (4,285 male, 6,225 female) and in 1942—7,957 (3,445 male, 4,512 female). This was an increase in 1943 of 2,553 treatments or 32.1% increase.

Syphilis:

In 1943 there was an increase of 60 cases of syphilis reported, which is 27.6% increase from 1942. The increase was from 217 cases in 1942 to 277 in 1943. The increase in male cases was from 123 in 1942 to 173 in 1943, an increase of 50 cases, or 40.6%. Among females there was an increase of 10 cases, that is from 94 in 1942 to 104 in 1943.

In the clinics the number of cases reported was: In 1942—93 (48 male, and 45 female) and in 1943—122 (70 male, and 52 female), an increase of 29 or 31.1%. The increase in male cases was 22 or 45.8% and in females 7 or 15.5%.

SYPHILIS—By stages of the disease and by whom reported.

Totals by sex.....	84	51	70	52	19	1	173	104	277	
Totals both sexes.....	135		122		20		277			

The syphilis treatments given at the clinics in 1943 were 6,852 (3,930 male, 2,922 female). This is a reduction in 1943 of 809 treatments or 10.7%

There were 227 gonorrhoea and 11 syphilis patients discharged from our clinics as apparently cured in 1943. The average number of treatments per patient at the clinics for 384 syphilitic patients was 17.8 and for 474 gonorrhoeal patients the average was 22.2.

The amount of drugs supplied to doctors for syphilis patients was 2,228 doses of arsenicals in 1943, in comparison with 2,213 doses in 1942. The amount of bismuth salicylate supplied in 1943 to doctors was 5,700 c.c., and in 1942—3,030 c.c.

Division of Sanitation

REGINA, SASK., January 25, 1944.

DR. R. O. DAVISON,
Deputy Minister of Public Health,
Regina, Saskatchewan.

Sir,—

The following report covers the work of the Division of Sanitation for the calendar year 1943.

WATERWORKS AND SEWERAGE

Municipal Waterworks.

The total value of certificates issued for the extension and construction of waterworks systems was \$13,140.00 and represented 5 applications.

Urban and Rural Water Supplies.

An opinion was given on a total of 2,289 water samples which were submitted to the Department for analysis.

Sewerage and Sewage Disposal.

Four certificates were issued for the extension or construction of sewage disposal plants and sewerage systems, representing a total value of \$9,062.00.

URBAN AND RURAL SANITATION.

The total number of inspections made during the year was 15,306.

Milk Supplies.

There are now 303 towns, villages and rural municipalities in the Province which have passed bylaws for the licensing of milk vendors and the compulsory testing of dairy cattle for tuberculosis. Of this number 149 bylaws provide for the testing of cows for infectious bovine abortion in addition to the tuberculin testing.

One thousand, eight hundred and seventy-six inspections of milk supplies were made.

Food Supplies.

Two thousand, one hundred and twenty-three butcher shops, slaughter houses and bakeries, where food is stored, processed or sold to the public, were inspected during the year.

Hotels, Boarding Houses and Restaurants.

Two thousand, seven hundred and twenty inspections have been carried out under this heading.

Summer Resorts and Tourist Camps.

Forty-three inspections of summer resorts and thirty-four of tourist camps were made during the year.

Lumber, Mine and Construction Camps.

Fifty-nine inspections were made during the period under review.

GENERAL.

Plumbing.

A total of 48 plumbing permits were issued. The value of permit fees was \$264.00 and eighty-three plumbing inspections were made by the Sanitary Officers.

Communicable Diseases.

The number of inspections made in connection with communicable disease was eight.

Vital Statistics.

Inspections and investigations in connection with vital statistics records totalled 125.

Ice Permits.

One hundred and four permits regarding the sanitary quality of ice harvested by individuals and companies were issued during the winter months.

Cemetery Sites.

Seven new cemeteries were established this year following the submission of satisfactory information regarding the topography and environment of the areas. The sites approved are located at Shamrock, Lintlaw, Middle Lake, Crooked River, Blue Heron, Valley Park and Eldred, also additions to cemeteries at Eston and Borden were made.

Slaughter Houses.

Licences issued to butchers	219
Licences issued to beef rings	76
Total	295

Hydrocyanic Acid Fumigation.

Permits were issued to seven fumigators authorizing them to use hydrocyanic acid gas.

Council and Public Meetings.

The district sanitary officers addressed a total of thirty-five meetings of municipal councils and other public bodies.

Summary of Inspections.

Sanitary environment inspections	623
Water, milk and food supplies	6,814
Hotels, Boarding Houses and Restaurants	2,720
Waste Disposal	1,400
Public places, schools, institutions, etc.	232
Communicable disease and Vital statistics	133
Plumbing	83
Camps	59
Barber Shops	293
Sundry and miscellaneous	2,949
	15,306

HOSPITAL INSPECTIONS

Twelve inspections were made in connection with sites for proposed hospitals, additions to hospitals, newly established hospitals, etc. In addition 13 routine inspections in connection with plumbing and drainage were made by the District Sanitary Officers.

CORRESPONDENCE.

During the year 3,801 letters were received and 6,911 were dispatched, including circular letters and correspondence to and from the District Sanitary Officers.

APPENDICES

Attached are four tables in connection with this report: Number 1 is in connection with waterworks, number 2, sewerage and sewage disposal, number 3, sanitary environment scores awarded urban municipalities and number 4, inspections made by District Sanitary Officers.

Respectfully submitted,

J. G. SCHAEFFER,
Director,
Division of Sanitation.

Division of Laboratories

REGINA, SASK., January 26, 1944.

DR. R. O. DAVISON,
Deputy Minister of Public Health.

Sir :

I have the honour to present the following report on the work of the Division of Laboratories for the year 1943.

During the year the Laboratories made a total of 87,916 examinations which was an increase of 11,793 or 16% over the year 1942. While there was very little increase in the total number of specimens reaching the Laboratory the increase was due in a large measure to the increased amount of work done on many of the samples of blood submitted for sero-diagnosis of syphilis. During the year the routine of examination of such samples was changed. All sera were submitted to a highly sensitive screen test—the Presumptive Kahn—and all those showing any reaction were further examined by the Standard or Diagnostic Kahn and the Kolmer Wassermann. This change was necessary because of the recognition that no one test could be relied on in the diagnosis of syphilis, and resulted in the 69,105 examinations being made on 58,956 specimens.

Every effort has been made during the year to co-operate with the Medical Officers of the various military establishments in the province and provide them with whatever service could be offered. At the request of the Department of National Defence preparations were made to undertake the examination of blood samples from all recruits entering the army. But, while the Laboratories are prepared, the program has not yet begun.

Table 1 summarizes the work of the Laboratory for 1943.

TABLE I.

Bacteriology:

Diphtheria	
Direct smears	10
Cultures	636
Virulence tests	10
Further tests	1
Hemolytic Streptococcus	18
Vincent's Angina	29
Tuberculosis	
Sputa	180
Urine	7
Miscellaneous	4
Guinea Pig inoculations	10
Gonorrhoea	
Smears	4538
Cultures	14
Complement fixation	4
Meningitis cultures	5
Whooping Cough	2
Blood Cultures	217
Urine Cultures	48
Feces Examinations	
Cultures	148
Parasites and ovae	50
Pleural fluids	27
Fungus Infections	4

Sterility tests (for hospitals)	4
Rabies	1
Miscellaneous Bact. Exams.	318
Vaccines	60
Total	6345

Blood Agglutinations:

typhi H and O	301
paratyphi A	171
paratyphi B (type and group) ..	285
Brucella abortus	857
Pasteurella tularensis	61
Shiga dysentery	2
Flexner paradysentery	4
Rocky Mountain Spotted Fever ..	1
Heterophile antibodies	4
Total	1686

Hematology:

Complete Blood counts	53
Differential smears	344
Grouping	579
Total	976

TABLE I.—*Continued*

<i>Sanitary Examinations:—Cont'd</i>		Mastitis tests	66
<i>Syphilis:</i>		Other Foods	33
Primary Lesions		Total	6776
Fontana's stain	67		
Blood serum		<i>Chemical Examinations:</i>	
Presumptive Kahn	38825	Clinical	
Diagnostic Kahn	4508	Blood glucose	104
Quantitative Kahn	470	Blood urea and N.P.N.	60
Kolmer Wassermann	24864	Blood creatinine	3
Laughlen	433	Blood calcium	8
Cerebrospinal Fluids		Blood Miscellaneous	4
Kolmer Wassermann	595	Icterus Index	7
Colloidal Gold	144	Glucose tolerance	16
Protein :.....	107	Urinalysis	1385
Glucose	97	Lead in urine	1
Chloride	29	Gastric analysis	35
Cell count	99	Liquor Act Samples	49
Total	70238	Liquor Board Samples	29
<i>Sanitary Examinations:</i>		Toxicology	
Water		Coroner's samples	50
B. coli presumptive	2092	General	49
B. coli confirmed	531	Specifications	6
Standard plate count	1390	Food	37
Chemical	2276	Water, complete analysis	27
Milk		Miscellaneous	25
Standard plate count	160	Total	1895
B. coli count	54	GRAND TOTAL	87,916
Chemical	174		

Diphtheria: A total of 646 direct smears and cultures were submitted with 35 showing typical organisms. Virulence tests were carried out on organisms isolated from 10 specimens submitted with only 3 proving to be toxigenic.

In connection with the work on throat swabs 29 specimens received for examination showed the presence of the organisms of Vincent's Angina, and Hemolytic Streptococci were isolated from 18 cases.

Tuberculosis: 189 specimens, most of which were sputum samples reached the Laboratory and of these only 5 were positive. Inoculations into guinea pigs were carried out in 10 cases but there were no positive findings. Table II shows the origin of positive specimens received.

TABLE II.

Infections due to Tubercle bacillus.

Total number specimens	189
Sputa	2
Urine	1
Cervical gland	1
Knee	1

Gonorrhoea: There were 4,538 direct smears forwarded for microscopic examination during the year 1943, which compared with 3,625 for 1942. The number of positives was considerably greater, reaching 474, (10.44%) as compared with 265 (7.3%) for the previous year. During the year preliminary plans were put into effect for culturing the Gonococcus and during 1944 this program will be expanded to supply any demand the existing Laboratories can logically meet.

Enteric Diseases: During the year the scope of the work in this field was expanded to provide a more complete examination of all possible infections of this type. Blood culturing was introduced as a routine procedure, and each serum submitted for a Widal test was agglutinated with both H and O antigens of typhi, paratyphi A and B, Brucella abortus and Pasteurella tularensis. By using these antigens it was possible to evaluate the effect of vaccination against the typhoids in samples, thus eliminating doubt in interpreting agglutinations. The agglutinations for undulant fever are included in this section of the work as are those for tular-emia, and while few positive cases of these infections are found, they are valuable as precautionary surveys and cost little when done along with other examinations of the same type.

Efforts are being made continually to encourage the submission of feces and urine samples as well as blood in cases of suspected enteric infections. This has resulted in the Laboratories receiving 148 specimens of this sort as compared with 79 last year. Table III summarizes the results obtained from the agglutination tests on blood and table IV shows the organisms isolated from Feces and Urine samples:

TABLE III.
Positive Blood Agglutinations

Total specimens received	306
Typhi H	20
Typhi O	6
Para A	5
Para B type	12
Para B group	2
Brucella abortus	10 (857 specimens)
Ps. tularensis	0

TABLE IV.
Isolations from Enteric specimens.

Total specimens received, Feces and Urine	148
Salmonella typhi	3
Salmonella paratyphi B	5
Salmonella morgani	1
Blood Cultures (Total)	105
Paratyphi B	1

Syphilis:

It was not until May that the new routine mentioned previously was put into effect, as a consequence all sera were not subjected to the Presumptive Kahn screen test and the proportion of Kolmer Wassermann tests to Presumptive and Standard Kahn tests shown in Table I is not truly representative. Of the 58,956 blood specimens submitted, 807 or 1.37% were positive while of the 67 smears from suspected primary lesions received for examination, 13 or 19.4% showed the presence of Spirochaete pallida. It is hoped that during 1944 additional microscopes will be available and the darkfield examination introduced to largely replace the use of Fontana's stain on smears. Table V shows the distribution of work done in this section during 1943.

TABLE V.

	Total	Positive	Percent. Positive
<i>Primary Lesions:</i>			
(Fontana's stain)	67	13	19.4
Specimens for sero-diagnosis	58,956	807	1.37
<i>Army:</i>			
Men	6,410	93	1.45
C.W.A.C.	843	3	0.35
<i>Airforce:</i>			
Men	5,345	55	1.03
Women's Division	926	1	.10
<i>Blood Donors:</i>			
Regina	5,444	2	.037
Rural	1,784	1	.056
<i>Civilian</i>	38,204	752	1.97

Cerebrospinal Fluid: Recognizing the importance of specimens of this type in the diagnosis of syphilitic infections as well as other diseases of the central nervous system, more extensive examinations have been instituted on such material during 1943. Where the volume of the sample permits, the Quantitative Kolmer Wassermann, Colloidal Gold test, and protein are done routinely on all specimens, while direct smears, cell count, culture, glucose, chloride, globulin and albumen are done upon request or as the history seems to require. Table VI summarizes the work on specimens from this source:

TABLE VI.

Cerebrospinal Fluids.

Number specimens received	599
	Total Positive
	Total
Kolmer Wasserman	595 58
Colloidal Gold	144 16
<i>Isolations from 48 specimens:</i>	
Meningococcus	2
Pneumococcus	5
H. influenza	2
Staphylococcus	2
Contaminated	37
(spore bearers)	

Miscellaneous Biological Examinations: Miscellaneous bacteriological examinations included the small number of pneumococcus examinations and the examinations for Hemolytic Streptococcus which were few in number during 1943. Considerable success has been attained in the preparation of vaccines for various chronic skin conditions. This service is provided particularly for the rural physicians who have no laboratory facilities available.

Table VII summarizes the positive findings from 50 specimens of feces for examination for parasites and ovae:

TABLE VII.

Parasites and Ovae Isolated from Feces.

Specimens received	50
Taenia saginata	1
Oxyuris vermicularis	2
Lepitoptera	1

Table VIII indicates the results obtained in examining 4 cases for fungus infections:

TABLE VIII.

Fungus Infections.

Epidermophyton	1
Microsporum lanosum	1
Actinomyces	2

During the year it was decided to remodel the Laboratory quarters in order to provide more working space. This was necessary because of the increased volume of work and the increased staff necessary to maintain the service. This work was begun early in September and at the end of the year was still incomplete. During this time the volume of work coming into the Laboratories remained at a high level and the work was carried out under extreme difficulties.

The increase in work during the years since the beginning of the war had not been met with corresponding increase in staff, hence during 1943 the staff was increased from eleven to sixteen. The increase in personnel consisted of three technicians, one stenographer and one glass washer. Training was provided for two of the staff of the Provincial Hospitals which would permit the establishment of routine laboratory services in the two hospitals.

Respectfully submitted,

W. A. RIDDELL, PH.D.

Acting Director.

Public Health Nursing

DR. R. O. DAVISON,
Deputy Minister of Public Health,
Regina, Saskatchewan.

Sir,—

I beg to submit herewith the report of the Division of Public Health Nursing for the year ended December 31, 1943.

1. GENERAL:

The re-organization of public health nursing districts was the outstanding feature of the work of this Division in the year under review. The province was divided into 26 districts which meant a considerable reduction in the area served by each nurse with a consequent decrease in the number of schools for health supervision, of families to be served and of miles to be travelled. More intensive work has been possible in every district and more satisfactory results have already been reported. Headquarters centres have been set up at Carlyle, Weyburn, Assiniboia (East and West), Shaunavon (North and South), Herbert, Moose Jaw, Regina, Wolseley, Yorkton, Wynyard, Watrous, Outlook, Kindersley, Kerrobert, Saskatoon, Humboldt, Preeceville, Tisdale, Melfort, Prince Albert, North Battleford (West and North), Green Lake and Cumberland House. The number of public health nurses has been doubled since 1941 which means excellent progress in this work. Every effort will be made to maintain this number and to increase it from time to time, as may be possible. The work of the nurse is appreciated as never before and the demands for her services are greater than even our increased staff can carry.

Every city in Saskatchewan now provides public health nursing services, financed locally. In all, 46 public health or school nurses are serving the children in Saskatchewan schools.

2. SCHOOL WORK:

(a) Routine—

During the year 1,488 schools were visited and inspected by the nurses. This was an increase of 617 over last year. In connection with this school work 39,481 children were given health inspection, 1,468 school officials visited, 12,895 school home visits were made and the nurses gave 1,948 health talks. A sanitation and health inspection report on each school visited was forwarded to the School Board. Each report contained recommendations re improvements in the school plant which might assist in protecting the health of the pupils.

(b) Teachers' Reports—

At the close of the year a questionnaire was sent to each school visited by the nurses. A study of the 1,057 replies received revealed the following information:

985 schools reported corrections of physical defects following the nurse's visit.

657 schools reported improvements in school sanitation.

986 schools reported special health teaching procedures.

The total number of children having defects corrected, showing corrections and improvement in health following the visit of the nurse was reported by teachers as 20,597. This figure does not include immunization.

(c) Dental Clinics—

At 39 dental clinics held, 1,135 children were treated. Thirty of these clinics were organized and financed locally, the initiative being taken usually by Women's Clubs or by the School Boards. Seven clinics were assisted financially through the Dental Fund. The dentist was assisted by a public health nurse at each clinic.

(d) Immunization—

Public health nurses continue their educational program regarding immunization. School boards and parents are becoming steadily more anxious to secure this health protection for their children, the only serious handicap now being the small number of doctors available to undertake these large scale immunization programmes. Nurses of this staff gave assistance with the following number of immunizations:

Number protected against smallpox	11,868
Number protected against scarlet fever	24,918
Number protected against diphtheria	15,721
Number protected against whooping cough	541

(e) Vision cases—

Through the special arrangement with the Canadian National Institute for the Blind, assistance continues to be given to children whose parents are unable to provide the necessary care for vision defects. Provision is made for examination, treatment and glasses. This year 141 cases were given the necessary corrections. For many cases, long distances from medical service, provision was made also for transportation.

(f) Orthopedic cases—

During the past year twenty-eight orthopedic cases were referred to the Junior Red Cross Society or the Shriners Hospital for Crippled Children. Seven of these cases were accepted and treated by the Junior Red Cross Society. Fourteen cases were accepted for treatment in the Shriners Hospital for Crippled Children in Winnipeg.

(g) School Health Material—

In spite of difficulties in securing pamphlets and other publications to aid in the teaching of health, considerable quantities of helpful materials are still available for distribution to teachers. The number of teachers supplied with this material on request during 1943 was 911.

3. PRE-SCHOOL WORK:

(a) Pre-Natal—

Nurses talked with the expectant mother in 443 home visits. Literature, which plays an important part in maternal and child welfare was distributed by the nurses and was sent also on request from the office. "The Canadian Mother and Child" supplied by the Department of Pensions and National Health, Ottawa, and pre-natal and post-natal letters supplied by the Canadian Welfare Council are available. The total number of these books distributed was 7,607.

(b) Infant and Pre-School Welfare—

This year 155 health centres were held at which the total attendance was 2,815. The number of homes visited with reference to children of this age group was 8,596.

In addition to the personal contacts made by the nurses, parents have received assistance with the care of their children by means of literature distributed by this office. Twelve thousand one hundred and fifty copies of various publications on the care of the pre-school and school age child were distributed to parents.

4. HOME VISITS:

The objective for home visits set for the staff for 1943 was 10,000. This objective was more than realized, home visits for the year totalling 15,141. This was an increase of 5,141 over the number made in 1942, and gives some picture of the extension of nursing services of the province.

5. SPECIAL WORK:

(a) Northern Areas—

Cumberland House and Green Lake continue to give hospital care and community public health service. At Cumberland House 12 maternity cases and 21 medical cases received nursing care. Protection against smallpox was given in 87 cases, the same number were immunized against scarlet fever and 77 were immunized against diphtheria. Cod liver oil, to be given to school children by the Sister teacher, was supplied to Cumberland House.

At Green Lake 62 patients were given nursing care in the infirmary, 100 school children were inspected and visited each month. Home calls in pre-natal cases were made and bedside nursing care was given throughout the year.

(b) Mental Defectives—

Special reports were made on 49 mental defectives for whom parents were asking institutional care. A few of the cases were visited upon the request of the Dependents Advisory Board, Ottawa.

(c) Private Hospitals and Nursing Homes—

In order that satisfactory conditions may be assured in private hospitals and nursing homes, visits of inspection are made by nurses, 104 such visits having been made during 1943. Some persons in charge of nursing homes have been obliged to discontinue this community service in cases where there is no longer a resident doctor. The number in operation during 1943 was 102 with a total bed capacity of 935, and 6,119 patients admitted. Of this number 1,934 were maternity cases, 1,750 of whom were attended by a doctor. Three maternal deaths occurred among this number. Five hundred and eighty-six of the total number of patients cared for in nursing homes were chronics, convalescents and aged.

6. MATERNITY GRANTS:

The number of maternity grants paid in the period under review was 727 as compared with 1,397 paid last year. The expenditure for 1943 was as follows:

Grants authorized	727
Amount paid to mothers	\$ 3,635.00
Amount paid to doctors	4,825.00
Amount paid to hospitals	64.00
Total	\$ 8,524.00

A summary of information revealed by the post-natal reports of medical examination is as follows:

Number of post-natal reports received	376
Number of mothers confined in hospital	282
Number of maternal deaths	0
Number of infant deaths	4
Number of still births	14

7. STAFF:

Nurses of this staff gave assistance with the provincial organization of the Red Cross Emergency Reserve. Through the nurses the central committee was put in touch with inactive and employed nurses who were willing to assist with the work. In many centres members of this staff also gave classes in Home Nursing to the Reserve Groups throughout the winter months. Appreciation for the help given was expressed by the Chairman of the Emergency Reserve of the Red Cross.

The Saskatchewan Registered Nurses' Association asked the assistance of nurses of the Department of Public Health in making a survey of living and working conditions in hospitals of the province. In connection with this survey sixty-six hospitals were visited and reports submitted.

In extending the work of the programme of prevention, the Anti-Tuberculosis League is conducting more large scale surveys in rural areas. Arrangements were made to have a public health nurse assist with each survey.

Members of the staff gave a series of ten lectures in Public Health Nursing to students in nine Schools of Nursing. By accompanying the nurse for one week the senior or intermediate students of these training schools were given the added advantage of observation in field work.

Two members of the staff attended a course in the Kenny Technique in the nursing care of cases of Anterior Poliomyelitis given at the Northwestern University Medical School. Upon their return they demonstrated the Kenny treatment to various groups of nurses of the province. These nurses also gave assistance with the organization of and treatment in the provincial Poliomyelitis Clinic.

Three nurses returned from Universities in May, having successfully completed the year of graduate study in public health nursing. One of the nurses brought distinction to the province by leading her class and receiving a prize for highest standing in the class in Public Health Nursing. Three nurses were on leave of absence for the 1943-44 University year.

In-service education of the staff was promoted by staff conferences and refresher courses. A three day refresher course was held in April, a second in November.

ACKNOWLEDGMENT:

Grateful appreciation is expressed to all persons and organizations who have assisted the work of this division.

Respectfully submitted,
ELIZABETH SMITH, Reg. N.
Acting Director of Nursing Services.

SUMMARY OF WORK OF PUBLIC HEALTH NURSES, 1943

1. SCHOOL WORK:	1942	1943		
Number of schools visited	871	1,488		
Number of pupils inspected	28,079	39,481		
Number of pupils with no apparent defect	3,711	5,325		
Number of health talks given in schools	1,565	1,948		
		<i>Signs of defect reported</i>	<i>Corrections reported by teachers</i>	
			(611 reports)	(1,057 reports)
(a) Inspection of pupils—	1942	1943	1942	1943
Defective vision	3,537	3,808	855	1,608
Defective hearing	548	980	111	171
Discharging ears	107	74	107	142
Unhealthy throat	7,922	9,463	892	1,546
Nasal obstruction	2,301	2,885	585	1,100
Carious teeth—temporary	9,587	13,346	4,389	7,642
Carious teeth—permanent	13,613	18,984		
Enlarged thyroid	635	793	52	71
Orthopedic defect	76	81	56	68
Skin eruptions	600	1,015	505	947
Nervous disorders	123	175	49	86
Special cases	119	252	76	201
Dental corrections recorded in dental clinics for which no teacher's report was received			1,161	1,086
Total dental corrections			5,550	8,728
Immunization of school children as reported at the time of the visit of the nurse—				
Vaccination	12,971	17,168	3,582	6,505
Diphtheria toxoid	14,029	18,801	4,422	7,266
Scarlet fever serum	9,316	13,051	3,855	6,565
Whooping cough vaccine	579	1,721	491	1,861
Improved gain in growth			4,602	7,015
(b) School improvements reported by teachers following the recommendation of the public health nurse—				
Lighting			51	105
Ventilation			32	55
Cleanliness			188	360
Desks			107	168
Blackboards			97	194
Water supply			100	151
Washing facilities			118	180
Toilets			110	219
(c) Special health efforts reported by teachers—				
Dramatization			236	303
Junior Red Cross Organization			508	798
Hot noon lunch			117	153
Weight record			152	181
Morning inspection			467	865
Clean hands campaign			480	768
School housekeeping			297	503
Individual ownership			453	756
Collection of health literature			290	434
Health as a phase of general enterprise			315	516
(d) Health teaching material sent to schools at request of teacher—				
Plays, stories, booklets, etc.			744	911
School-age letters (public and high school) sent to parents			5,502	9,112
(e) Dental Clinics—				
Number of clinics held			55	39
Number of children treated			1,481	1,135

2. PRE-SCHOOL WORK :

Number of infant and pre-school health conferences	1	6
Number of children examined by doctor	30	239
Number of weighing centres	100	155
Attendance	1,538	2,815

Pre-school literature sent out—

Pre-natal letters	4,752	1,500
Post-natal letters	4,668	4,107
Pre-school letters	2,616	3,038
Miscellaneous (diet lists, habit training, accident prevention, immunization, etc., etc.)	24,160	14,280
Canadian Mother and Child	1,698	2,000

3. ASSISTANCE WITH IMMUNIZATION :

Number of school districts	346	414
Number of children vaccinated	8,518	11,868
Number of children given diphtheria toxoid	8,118	15,721
Number of children given scarlet fever serum	8,506	24,918
Number of children given whooping cough vaccine	499	541

4. HOME NURSING CLASSES: (Junior and Senior)—

Number of classes conducted	268	165
Attendance	4,524	3,510

5. SPECIAL WORK :

Number of special visits re mental cases	48	49
Number of tuberculosis cases visited in homes	3	10
Number of Nursing Home inspections	107	104
Number of meetings addressed	143	103

6. RELIEF WORK :

Number of cases of crippled children reported to Junior Red Cross and Shriners' Hospital	9	28
Number of cases reported to Canadian National Institute for the Blind	202	141

7. BEDSIDE CARE SERVICE :

Number of maternity cases attended	10	12
Number of bedside care visits	419	416
Number of office consultations re illness	2,798	1,268
Number of medical cases	21

8. SUMMARY OF HOME VISITS :

Number of home visits	9,952	15,141
-----------------------------	-------	--------

Services represented—

Pre-natal	251	443
Infant welfare	1,043	2,262
Pre-school	3,625	6,242
School	7,908	12,791
Trachoma	263	5
Other communicable diseases	262	205
Special cases	403	445

9. OFFICIAL CALLS AND CONSULTATIONS :

Medical health officers	395	431
Municipal officials	289	379
School officials	935	1,486
Women's organizations	192	223
Dentists	227	51
Number of obstetrical cases attended (Cumberland House)	10	12

10. MATERNITY GRANTS :

Number of Grants authorized	1,397	727
Amount paid to mothers	\$ 6,985.00	\$3,635.00
Amount paid to doctors	\$11,838.00	\$4,825.00
Contributions toward hospital accounts	\$ 48.00	\$ 64.00
Total disbursements for Maternity Grants	\$18,871.00	\$8,524.00

Government-Aided Hospitals

REGINA, December 15, 1944.

DR. R. O. DAVISON,
Deputy Minister of Public Health,
Regina, Saskatchewan.

Sir,—

I beg to submit herewith the report on government-aided hospitals for the calendar year 1943.

CHANGES DURING YEAR.

Two hospitals were closed during the year namely:

Rouleau Community	June 30, 1943
Tuxford Community	Dec. 31, 1943

ADDITIONS DURING THE YEAR.

During the year a new 37 bed hospital was built at Biggar by the Sisters of Charity to replace the building used by them since 1923. The Moose Jaw General Hospital also built a much needed addition to their nurses' home during the year.

CLASSIFICATION OF HOSPITALS.

There were in operation at the end of the year, 3 Sanatoria, 9 Red Cross Outposts and 78 General Hospitals.

These may be classified according to ownership as follows:

23 Community.
22 Union Hospital Districts.
18 R. C. Sisters.
9 Municipal.
3 Doctors.
2 United Church.
1 Presbyterian Church.

—
78

BED COMPLEMENT.

The actual number of beds available in general hospitals was as follows:

3,512 adult beds	336 cribs	703 bassinets.
------------------	-----------	----------------

HOSPITAL STAFF.

Last year general hospitals employed a total of 2,755 persons as compared with 2,673 in 1942 and 2,581 in 1941.

These may be classified as follows:

Administration—

	1943	1942
Executive	49	52
Clerical	136	126
Professional—		
Salaried Doctors full time	3	6
Salaried Doctors part time	7	7
Internes	17	14
Technicians	89	79
Nursing Staff—		
Graduates	565	562
Students	727	693
Graduate Dietitians	12	12
Orderlies and Ward Helpers	248	215
All other employees	902	907
Total Staff	2,755	2,673

PATIENTS.

There were 87,033 adults and children as well as 12,760 newborn patients cared for in general hospitals during the year making a total of 99,793 as compared with 92,684 for 1942 which represents an increase of 7,109 patients or 7.6% over the previous year.

HOSPITAL DAYS.

The collective hospital days of patients' during the year was 1,005,018 as compared with the previous year's figure of 938,551. This is an increase of 66,467 days or 7.1% over 1942. 882,336 of these were for adults and children while 122,682 were newborn days in nursery.

HOSPITAL AVERAGES.

Two thousand four hundred and seventeen adults and children and 336 newborn were cared for in hospitals daily.

The average stay of adults and children was 8.7 days compared with 10.1 days in the previous year, while the average stay of newborn was 9.5 as compared with 9.9 in 1942.

The average bed occupancy of hospitals increased from 68% in 1942 to 75% in 1943.

NURSES' TRAINING SCHOOLS, INTERNES AND GRADUATE NURSES.

During the year 245 nurses graduated from the 10 nurses training schools compared with 224 for the previous 2 years.

	Student Nurses	Nurses Graduating	Internes on Staff	Graduates on Staff
Humboldt, St. Elizabeth's	26	24	14	1
Moose Jaw, General	77	24	14	1
Moose Jaw, Providence	30	13	13	...
Prince Albert, Holy Family	47	15	8	...
Prince Albert, Victoria	22	12	12	...
Regina, General	110	42	58	5
Regina, Grey Nuns'	135	27	34	7
Saskatoon, City	142	50	20	2
Saskatoon, St. Paul's	110	40	17	2
Yorkton, Queen Victoria	28	12	21	...
Totals, 1943	727	245	207	17
Totals, 1942	693	224	193	14

MATERNITY CASES AND BIRTHS.

There were 12,612 confinements in hospitals last year compared with 11,274 cases in 1942 or an increase of 1,338.

Maternity cases comprised 14.5% of the total adult admissions compared with 13.8% in 1942.

There were 12,296 living births in hospitals of which 6,322 were male and 5,974 female babies.

The total number of living births in the province in 1943 was 18,507 of which 12,296 or 66.4% were born in government aided hospitals.

The following percentages will indicate the trend towards the increased use of hospital facilities for maternity cases.

1932	27%	
1934	31%	
1936	37%	
1938	46%	
1940	52%	of all births were in
1941	56%	approved hospitals.
1942	61%	
1943	66%	

There were 15 maternal deaths reported in hospitals compared with 26 last year for a death rate of 1.2 per thousand living births.

There were 286 newborn deaths in hospitals which represents a death rate of 23.2 per thousand living births compared with 21.2 for 1942.

There were also 251 stillbirths in hospitals.

HOSPITAL SURGERY AND ANAESTHESIA.

There were 34,964 surgical operations performed in hospitals last year compared with 32,647 in 1942.

The following are the comparative figures for the two years:

	1943	1942
<i>Abdominal:</i>		
Appendectomy	5,471	5,394
Gall Bladder	449	448
Gall Bladder and Appendectomy	201	245
Hernia	1,196	1,020
Other Abdominal	1,419	1,454
<i>Gynecological:</i>		
Hysterectomy	400	344
Tubes and Ovaries	566	610
Curretages	1,331	1,241
Other Gynecological	1,312	1,161
<i>General:</i>		
Tonsillectomy	9,046	8,112
Thyroidectomy	418	313
Amputations	310	342
Other Major Operations	1,402	1,147
Other Minor Operations	11,443	10,816
Totals	34,964	32,647

There were 239 deaths within 10 days after surgical operations compared with 246 in 1942.

There has been a steady increase in the number of blood transfusions given in the past three years the figures being 1,729 in 1941; 2,070 in 1942 and 2,429 in 1943.

There were also 265 operative fractures and 2,228 fractures treated by means of manual reduction.

The 34,569 anaesthetics administered in operative cases can be classified as follows:

General	21,791
Spinal	5,113
Local	7,665

There were 4 deaths resulting from anaesthetics.

SPECIAL DISEASES.

The following is a list of the special diseases under study showing the comparative number of cases treated in hospitals for the past two years.

	1943	1942
Cardiac and Arteries	2,414	1,869
Communicable Diseases	2,291	1,611
Cancer	1,548	1,400
Arthritis	736	740
Goitre	686	446
Rheumatic	651	720
Nephritis	518	634
Pulmonary Tuberculosis	210	242
Other forms of Tuberculosis	145	114
Gonorrhoea	94	81
Syphilis	74	78
Typhoid Fever	32	33

REVENUE AND EXPENDITURE

The total revenue from all hospitals for the year amounted to \$3,730,408.24 while the total expenditures were \$3,702,517.29.

The following is a comparative statement of expenditures for the past two years.

	1943	1942
Salaries and Wages	\$1,581,305.60	\$1,384,908.88
Supplies	1,392,083.69	1,295,741.85
Purchased Services	211,669.65	175,478.31
Insurance	19,300.58	19,647.64
Depreciation on Bldgs. and Equip.	209,318.14	196,265.11
Repairs to Bldgs. and Equip.	113,222.56	142,207.13
Interest and Exchange	122,548.15	145,424.15
Miscellaneous	58,383.15	54,404.14
Totals	\$3,707,831.52	\$3,414,077.21

The percentage of the group expenditure in relation to the total expenditures is as follows:

	1943	1942
Salaries and Wages	42.6	40.6
Supplies	37.6	37.9
Purchased Services	5.7	5.1
Insurance5	.6
Depreciation	5.6	5.8
Repairs	3.1	4.2
Interest and Exchange	3.3	4.3
Miscellaneous	1.6	1.5
	<hr/> 100.0	<hr/> 100.0

COST PER PATIENT DAY.

The average gross cost per patient per day was \$3.73 compared with \$3.70 for the previous year.

The average net cost, that is, the actual cost of patient care excluding depreciation, repairs and replacements and interest charges amounted to \$3.26 compared with \$3.17 for the previous year.

This figure is merely an index to show the average rise in costs as 27 hospitals showed a higher cost than \$3.26 while 52 hospitals had a patient day cost below this figure.

PROVINCIAL GRANT

The following shows a comparison between the hospital grants paid for the past two years.

	1943	1942
General Hospitals	\$482,633.50	\$449,126.00
Red Cross Hospitals	9,989.00	9,699.00
Tuberculosis Sanatoria	272,965.00	289,595.00
Totals	<hr/> \$765,587.50	<hr/> \$748,420.00

INDEX OF HOSPITAL TABLES.

The following tables are submitted, giving detailed information as obtained from the financial and statistical returns received from the hospitals:

TABLE 1—Hospital Accommodation, Staff, Nurses' Training Schools.

TABLE 2—Patients treated, Hospital days, Hospital averages, Deaths in Hospital.

TABLE 3—Hospital Surgery and Anaesthesia.

TABLE 4—Maternity Statistics and Special Diseases.

TABLE 5—Out-Patients, Clinical Services, Hospital Infections and Deaths.

TABLE 6—Operating Cost per Patient per Day.

TABLE 7—Government Grant, Hospital Revenue and Expenditure.

TABLE 8—Detailed statement of Revenue.

TABLE 9—Detailed statement of expenditure.

REPORT ON TUBERCULOSIS SANATORIA.

No statistical or financial information in regard to the three Tuberculosis Sanatoria has been included in the foregoing hospital tables owing to the specialized nature of their hospital services and the difference in the method of financing these institutions as compared with general hospitals.

The following schedules are therefore given in regard to the Sanatoria for the year 1943:

SCHEDULE 1—Bed Complement and Movement of Population.

SCHEDULE 2—Sanatoria Staff.

SCHEDULE 3—Surgical, Radiological and Laboratory Services.

SCHEDULE 4—Preventive Services.

SCHEDULE 5—Summary of all persons seen with active Tuberculosis in 1943.

SCHEDULE 6—Summary of Operating Costs.

SCHEDULE 7—Summary of Revenue.

No schedules on medical services are included in this report, as these are very fully dealt with in the annual report on the Saskatchewan Anti-Tuberculosis League for 1941.

Respectfully submitted,

C. F. W. HAMES, M.D., D.P.H.

Director of Hospital Administration.

Mental Hygiene

NORTH BATTLEFORD, SASK., *December 1, 1944.*

DR. R. O. DAVISON,
Deputy Minister of Public Health,
Regina, Saskatchewan.

Sir,—

I have the honour to submit herewith the Annual Reports of the Saskatchewan Mental Hospital at Battleford, the Saskatchewan Mental Hospital at Weyburn and the Psychopathic Wards, Regina, for the year ended April 30th, 1944.

The difficulties of the Hospitals have not decreased but have rather increased as the months have gone by: this is especially true of the Weyburn Hospital, owing to the fact that it is next to impossible to obtain suitable staff, or staff of any kind. Every effort has been made by everyone concerned to relieve the situation at that Hospital. Every avenue has been approached, and every means tried to obtain help, but with very little success, but I am hopeful that the situation will gradually improve.

The over-crowding in the Hospitals is a problem that confronts us, and is a detriment to the treatment of the patients, and the proper functioning of the Hospitals.

I am well aware that your Department is keenly alive to the situation, and intends to take steps to relieve the over-crowding at the earliest possible date.

One of the pressing needs in the Psychiatric field is the establishment of Mental Hygiene Clinics. When the time comes for such Clinics to be inaugurated, a much clearer picture will be obtained of the Psychiatric needs of the Province, than is at present possible. Along with Mental Hygiene Clinics should go lectures, films and general education of the Public in relation to the problems and purposes of Mental Hygiene.

I am convinced that these Mental Health Services should be continued and extended as time and circumstances permit.

I wish to express my deep appreciation to The Honourable, The Minister of Public Health, and to yourself as Deputy Minister of Public Health for the support you have at all times given me; for the interest you have taken in the Mental Hygiene effort, and for your long-range vision of the future requirements of the Province along Mental Hygiene lines.

I have the honour to be, Sir,

Your obedient servant,

J. W. MACNEILL, M.D., LL.D.
Commissioner of Mental Services
for the Province of Saskatchewan.

The Mental Hospital, North Battleford

NORTH BATTLEFORD, SASK., *December 1, 1944.*

DR. R. O. DAVISON,
Deputy Minister of Public Health,
Regina, Saskatchewan.

Sir,—

I have the honour to submit to you the 30th Annual Report of the Saskatchewan Mental Hospital at Battleford.

The question of inadequate help is, up to the present, one of our difficulties—both as to quantity and quality, but I suppose under War conditions, we must expect, and do the best we can to meet that difficulty.

The work of the Hospital in all its Branches has been carried on to the very best of our ability under adverse circumstances occasioned by over-crowding and the fact that a great many of our experienced staff have joined Military Services of one kind and another.

Since my last report went in to your Department, we have subscribed to the 5th and 6th Victory Loans in the year 1943, and I am sure you will agree with me that the splendid showing made at this Hospital, is something to be proud of. The following figures speak for themselves:

Fifth Victory Loan—

Public Health Staff:

58 cash applications	\$ 7,850.00
119 Payroll applications	6,950.00

\$14,800.00

Public Works' Staff:

33 Cash applications	\$ 4,350.00
29 Payroll applications	1,650.00

\$ 6,000.00

Sixth Victory Loan—

Public Health Staff:

61 Cash applications	\$ 10,600.00
160 Payroll applications	10,350.00

\$20,950.00

Public Works' Staff:

29 Cash applications	\$ 3,900.00
37 Payroll applications	2,150.00

\$ 6,050.00

The health of the Hospital population has been good throughout the year.

I wish to take this opportunity of thanking the staff of the Department of Public Health for the co-operation which I have received from them in the carrying on of the work of the Hospital.

In closing, I wish to express my thanks to The Honourable, The Minister of Public Health, and to yourself as Deputy Minister, for your unfailing interest in the work which we are doing here, and your keen interest in a forward-looking programme for psychiatry and the Mental Hygiene movement, which argues well for the future Mental Health of the Province of Saskatchewan.

I have the honour to be, Sir,

Your obedient servant,

J. W. MACNEILL, M.D., LL.D.,

*Commissioner of Mental Services
for the Province of Saskatchewan.*

TABLE NO. 9—DEATHS—PSYCHOTICS

No.	Sex	Age	Immediate Cause of Death	Predisposition
1	M	39	Pulmonary tuberculosis.....	Schizophrenia — hebephrenic type.
2	F	48	Exhaustion of acute mania.....	Undiagnosed.
3	F	54	Shock due to multiple injuries.....	Manic—depressive—manic.
4	M	60	Cerebral thrombosis due to general arteriosclerosis.....	Psychosis with cerebral arteriosclerosis.
5	M	39	Pulmonary tuberculosis.....	Manic-depressive psychosis—alternating.
6	F	39	Pulmonary tuberculosis.....	Schizophrenia — hebephrenic type.
7	F	22	Chronic meningitis, probably due to syphilis.....	Psychosis with cerebro-spinal syphilis.
8	F	57	Prolonged hypoglycaemic coma.....	Manic-depressive psychosis—manic type.
9	M	53	Coronary thrombosis.....	Dementia praecox — simple type.
10	M	50	Brain tumor—meningioma.....	Psychosis due to new growth—intracranial tumor.
11	M	68	Bronchopneumonia due to pulmonary edema.....	Psychosis with cerebral arteriosclerosis.
12	F	67	Shock due to obstruction of the transverse colon.....	Psychosis with cerebral arteriosclerosis.
13	F	38	Hypostatic pneumonia.....	Post encephalitis — lethargica.
14	M	85	Uraemia due to chronic nephritis.....	Senile psychosis — simple deterioration.
15	F	41	Acute hepatitis.....	Dementia praecox.
16	F	70	Lobar pneumonia.....	Psychosis with cerebral arteriosclerosis.
17	M	66	Lobar pneumonia.....	Senile psychosis — simple deterioration.
18	M	75	Septic meningitis due to cellulitis of the face.....	Senile psychosis.
19	M	50	Uraemia due to prostatic hypertrophy	Senile psychosis — paranoid type.
20	M	76	Surgical shock due to fracture of the femur.....	Senile psychosis.
21	M	32	Acute generalized miliary tuberculosis	Schizophrenia — hebephrenic type.
22	F	72	Pulmonary tuberculosis.....	Senile psychosis — presbyophrenic type.
23	M	30	Tuberculous peritonitis.....	Schizophrenia — hebephrenic type.
24	F	85	Fat embolism of the pulmonary artery	Amentia, sub class feeble mindedness.
25	M	72	Pulmonary tuberculosis.....	Manic-depressive — psychosis. depressed
26	F	78	Hemiplegia—chronic myocarditis.....	Psychosis with cerebral arteriosclerosis.
27	M	64	Softening of the brain.....	Psychosis with cerebral arteriosclerosis.
28	M	64	Softening of the brain.....	Psychosis with cerebral arteriosclerosis.
29	M	78	Softening of the brain.....	Senile psychosis with deterioration.
30	M	67	Softening of the brain.....	Psychosis with cerebral arteriosclerosis.
31	M	71	Hypostatic pneumonia.....	Psychosis with cerebral arteriosclerosis.
32	M	69	Hypostatic pneumonia.....	Psychosis with cerebral arteriosclerosis.
33	M	88	Hypostatic pneumonia.....	Senile psychosis.
34	M	74	Softening of the brain.....	Dementia praecox — catatonic state.
35	M	45	Aortic stenosis.....	Schizophrenia—paranoid.

TABLE NO. 9—DEATHS—PSYCHOTICS—*Continued*

No.	Sex	Age	Immediate Cause of Death	Predisposition
36	M	52	Peritonitis.....	Dementia praecox.
37	F	84	Bronchopneumonia.....	Senile psychosis — presbyo- phrenic type.
38	F	67	Softening of the brain.....	Psychosis with cerebral ar- teriosclerosis.
39	M	64	Hypostatic pneumonia.....	Psychosis with cerebral ar- teriosclerosis.
40	M	83	Coronary thrombosis.....	Senile psychosis — presbyo- phrenic type.
41	F	71	Softening of the brain.....	Senile psychosis.
42	F	52	Cerebral haemorrhage.....	Psychosis with cerebral ar- teriosclerosis.
43	F	83	Chronic myocarditis.....	Schizophrenia—paranoid.
44	M	20	Haemorrhage to the brain.....	Schizophrenia — catatonic type
45	M	52	Lobar pneumonia.....	Psychosis with cerebral ar- teriosclerosis.
46	F	70	Cario-renal disease.....	Senile psychosis.
47	F	49	Empyema.....	Undiagnosed.
48	M	65	Lobar pneumonia.....	Dementia praecox.
49	F	77	Cerebral haemorrhage.....	Psychosis with cerebral ar- teriosclerosis.
50	M	77	Lobar pneumonia.....	Senile dementia.
51	M	90	Chronic myocarditis.....	Senile psychosis.
52	M	78	Chronic myocarditis.....	Senile psychosis.
53	F	31	Exhaustion of acute mania.....	Manic depressive psychosis— manic type.
54	M	64	General paresis of the insane.....	General paresis of insane.
55	F	76	Meningeal haemorrhage.....	Psychosis with cerebral ar- teriosclerosis.
56	M	55	Cerebral thrombosis.....	Psychosis with cerebral ar- teriosclerosis.
57	M	62	Chronic myocarditis.....	Psychosis with cerebral ar- teriosclerosis.
58	M	76	Pulmonary infarction.....	Senile psychosis — simple deterioration.
59	F	92	Softening of the brain.....	Psychosis with cerebral ar- teriosclerosis.
60	M	53	Myocardial failure due to physical ex- haustion	Manic depressive psychosis— manic type.
61	M	58	Lobar pneumonia.....	Psychosis with cerebral ar- teriosclerosis.
62	M	76	Pulmonary embolus.....	Schizophrenia—paranoid.
63	M	97	Softening of the brain.....	Senile psychosis — simple type.
64	M	86	Lobar pneumonia.....	Senile psychosis — simple deterioration.
65	F	60	Pyelonephrosis.....	Involutional psychosis.
66	M	65	Pulmonary tuberculosis.....	Psychosis with arteriosclerosis.
67	M	69	Coronary thrombosis.....	Psychosis with arteriosclerosis.
68	M	79	Mesenteric thrombosis.....	Senile psychosis — simple deterioration.
69	M	96	Softening of the brain.....	Senile psychosis — simple deterioration.
70	F	78	Cerebral haemorrhage.....	Psychosis with cerebral ar- teriosclerosis.
71	F	64	Inanition.....	Dementia praecox.
72	F	75	Hypostatic pneumonia.....	Psychosis with cerebral ar- teriosclerosis.
73	F	78	Pneumonia.....	Senile psychosis.
74	M	60	Cerebral thrombosis.....	Dementia praecox.
75	M	62	Acute secondary anaemia.....	General paresis.
76	M	79	Softening of the brain.....	Senile psychosis — simple deterioration.
77	M	72	Softening of the brain.....	Psychosis with cerebral ar- teriosclerosis.

105	M	53	Bilateral lobar pneumonia.....	Psychosis with cerebral arteriosclerosis.
106	F	61	Bilateral bronchopneumonia.....	Psychosis with arteriosclerosis.
107	F	70	Hypostatic pneumonia due to generalized arteriosclerosis.....	Senile psychosis — simple deterioration.
108	F	74	Bilateral lobar pneumonia.....	Senile psychosis — simple deterioration.
109	M	64	Bilateral bronchopneumonia.....	Manic depressive psychosis — manic type.
110	M	61	Hypostatic pneumonia.....	Arteriosclerotic psychosis.
111	M	54	Lobar pneumonia.....	Psychosis with brain tumor
112	M	43	Bilateral pneumonia.....	Psychosis with cerebral arteriosclerosis.
113	M	62	Coronary thrombosis.....	Psychosis with cerebral arteriosclerosis.
114	M	54	Softening of the brain.....	General paresis of the insane.
115	M	73	Cerebral haemorrhage.....	Psychosis with cerebral arteriosclerosis.

TABLE NO. 10—DENTAL DEPARTMENT

The following is a report of the work done in the Dental Department of the Mental Hospital at Battleford during the fiscal year 1943:

	Extractions	Prophylaxis	Treatments	Fillings	Plates repaired
Female.....	151	17	..	42	8
Male.....	28	8	3
Total.....	179	17	..	50	11

In addition to above, one (1) denture was constructed.

J. W. MACNEILL, M.D., LL.D.,
Commissioner of Mental Services,
Saskatchewan Mental Hospital,
North Battleford, Saskatchewan.

Sir,—

I have the honour to submit to you the report of the work which has been accomplished in the various Workshops of this Hospital for the fiscal year 1943-44.

Occupational, Recreational and Industrial Therapies continue to be a most important factor in the treatment of Mental Illnesses.

We have now instituted a questionnaire which is filled out for each patient. This questionnaire asks for the previous occupation of the patient: their hobbies, musical talents; the games they like to play, and what they would like to learn to do while here. In this way, we are able to make use of any special talent, and to fit the patients congenially into the occupational, recreational and industrial activities of the Hospital.

I have the honour to be, Sir,

Your obedient servant,
HAZEL JACQUES,
Director of Occupational Therapy.

The Mental Hospital, Weyburn

WEYBURN, April 30, 1944.

DR. J. W. MACNEILL,
Commissioner of Mental Services,
 North Battleford, Saskatchewan.

Sir,

I beg to submit for your consideration the twenty-third annual report of the Saskatchewan Mental Hospital, Weyburn.

Our population continued to increase throughout the year and the tables compiled show a total population of 2,462 as compared with 2,391 at the beginning of the year. This total population includes approximately 800 mental defectives. The question of the difficulties involved and the impossibility of giving proper care and treatment to psychotics and mental defectives housed together under the one roof is something that we have discussed very frequently and I continue to hope that in the not too distant future steps will be taken to house these different types in separate institutions.

In addition to the fact that we have mental defectives on practically every ward of the institution, on the female wing particularly overcrowding becomes more and more of a problem. Combined with this is the apparent impossibility of obtaining an adequate staff. My grateful thanks are due the staff for their co-operation under these circumstances.

The staff have also continued to respond splendidly to every demand on their time and finances for war purposes, and the following figures are submitted in connection with the Third and Fourth Victory Loan drives:

Fourth Victory Loan, May, 1943

	No. subscribers	Cash	Payroll deductions
Public Health	164	\$5,750.00	\$7,050.00
Public Works	48	2,100.00	1,900.00

This makes a total of 212 subscribers, or a total amount of \$16,800.00. In addition to the above, our War Savings deductions amounted to \$627.50 per month.

Fifth Victory Loan, November, 1943.

	No. subscribers	Cash	Payroll deductions
Public Health	166	\$8,650.00	\$7,300.00
Public Works	56	2,350.00	3,050.00

This makes a total of 212 subscribers, or a total amount of \$16,800.00. In addition to the above, our War Savings deductions amounted to \$436.50 per month.

Figures were submitted last year on the Second and Third Victory Loan drives.

In conclusion I wish to thank you as Commissioner of Mental Services for your assistance to us at all times.

I have the honour to be, Sir,

Your obedient servant,

A. D. CAMPBELL, M.D.,

Superintendent.

98	M	66	Bronchopneumonia.....	Manic-depressive, depressed.

School For Mental Defectives, Weyburn

TABLE No. 11.

Number of teaching days: 229½.

School was closed for July 5 to 19, December 24 to January 5 and April 7 to 14. From July 19 to August 16 one teacher had leave of absence to attend summer school.

Summary of Enrolment:	Male	Female	Total

Female...	1	1	2	1	3	4	2	3	3	2	5	4	1	1	.	1	35
																	84

The I. Q's. of the children vary from 32 to 77 with several in the imbecile class, one Mongolian, and nine epileptics. Three of the boys are of above normal intelligence.

Attendance and School Activities:

Academic: All except 14 of the children attend half a day only. Attendance this year has been very regular. In the mornings one group does mostly manual work, while the other group does pre-primer, Grade I and II work. In the afternoons, half of the time is devoted to manual work, the other half to academic, the classes alternating. One group does Grade II and III work, while the Senior group ranges from Grade III to Grade VIII. Three pupils are preparing for the Grade VIII departmental examinations. Those doing Grade VI and VIII attended all day.

New work books and supplementary reading books were purchased during the year. This facilitates the work considerably.

In September we were fortunate in obtaining the loan of a silent film projector. Since then have had on the average of six films per month from the Audio-Visual Branch of the Department of Education. These are proving to be of great help in the teaching of these children.

Manual Work: The new fret-saw machine has made it possible for the boys to turn out quicker and better work. The work of both boys and girls was displayed and sold at the Annual Bazaar. Some of the work is also displayed in a showcase throughout the year for the visiting public to purchase.

Sports: Six pairs of skates were purchased for the school at the beginning of the skating season. This made it possible for more children to learn. They were taken skating at least once a week whenever weather permitted. Of the afternoon group there are only two or three now who do not skate.

Christmas Programme: This year the school was responsible for practically all of the programme. This consisted of three drills, two plays, a dance and several songs and rhythm band numbers.

School Garden: The garden of 1943 was a success. The children had an ample supply of produce to eat raw, outdoors. Once a week a group of five or six children prepared a supper for themselves utilizing as much of the garden produce as possible. They learned, in this way, to prepare and cook the food, set the table and serve the meal.

The Psychopathic Ward

January 7th, 1944.

DR. J. W. MACNEILL,
Commissioner of Mental Services,
North Battleford, Saskatchewan.

Dear Dr. MacNeill:

Herewith I am submitting a report on the work carried out in the Psychopathic Ward for the year ended December 31st, 1943.

During the year we have had a total number of 271 patients to deal with. Of this number 14 patients were in the Ward at the beginning of the year, and the other 257 were new admissions during the year. The total number of hospital days for 1943 was 7,309, which is a considerable increase over the previous year, and the average length of stay per patient was 26.9 days.

Of the total number of patients dealt with there were 183 who returned to their homes improved. There were 8 patients who returned to their homes but had not made any improvement. These were patients who were suffering from some mild form of psychosis and whose friends or relatives decided not to leave them, and a release was taken. There was one patient whom we have classified as being in for safe-keeping. This was a patient who stayed here over-night, at the request of the Department, on her way to Weyburn. There were four patients who were remanded here by the Court, awaiting a hearing, and they were returned to Court. We had 20 patients who were sent here for a period of observation and who did not prove to have any condition requiring treatment. There were five patients who were transferred to General Hospitals for further treatment after being here for a short time. We had 25 patients who did not make any progress here and whose conditions seemed to indicate that they would require treatment in a Mental Hospital, and they were transferred to one or other of the Mental Hospitals in the province. There were four deaths during the year, and we were able to obtain a post mortem examination on all but one. This patient was suffering from an advanced heart condition and did not have any form of psychosis, as her physician thought she had when she was admitted here. She remained only a short time and died of hypostatic pneumonia following auricular fibrillation. In the cases of the other three patients, the information on Schedule No. 2 indicates the causes of death.

In my last report for the year of 1942 I mentioned having adopted the electric shock treatment. This has been used almost entirely during the past year, with very satisfactory results. Some 150 patients were given the shock treatment and benefitted very much by it. This has shortened the average length of stay in the hospital to 26.9 days, whereas when we started to operate and no form of shock treatment was in use, the average length of stay was something over 30 days. It appears to be an almost entirely safe procedure with none of the complications which other forms of shock treatment have had, and patients do not seem to be disturbed at all by it. This has been our largest year of work in this Ward, and the results have been very encouraging.

I have the honour to be, Sir,

Your obedient servant,

O. E. ROTHWELL, M.D.,
Director,
Psychopathic Department.

Registrar General

REGINA, SASK., *January 2, 1945.*

DR. R. O. DAVISON,
Deputy Minister and Registrar General.
Regina, Sask.

SIR:—

I have the honour to submit herewith the report of the Registrar General for the calendar year 1943.

Respectfully submitted,
F. C. MIDDLETON, M.D.,
Deputy Registrar General.

ESTIMATED POPULATION 1943

The estimated population of Saskatchewan at June 1, 1943, was 842,000 a decrease of 6,000 over the 1942 re-estimated total of 848,000. These figures were supplied by the Dominion Bureau of Statistics.

TABLE 1.—ESTIMATED POPULATION OF SASKATCHEWAN BY MUNICIPALITIES, 1943.

Urban population.....	179,242	Villages.....	70,857
Rural population.....	662,758	Rural municipalities.....	607,552
Cities.....	147,189	Province.....	842,000
Towns.....	59,321		

Note:—Cities and towns with a population of 1,000 or over are classified as urban centres. The total of 842,000 has been used to compute the rates in this report. The 1942 rates are figured on a population of 906,000, and not on the re-estimated total of 848,000, which was supplied by Ottawa.

TABLE 2.—ESTIMATED POPULATION OF THE CITIES OF SASKATCHEWAN, 1943.

Moose Jaw.....	19,503	Swift Current.....	5,256
North Battleford.....	4,460	Weyburn.....	5,807
Prince Albert.....	11,755	Yorkton.....	5,240
Regina.....	54,734		
Saskatoon.....	40,435	Total.....	147,189

TABLE 3.—ESTIMATED POPULATION OF SASKATCHEWAN BY SEX AND AGE PERIODS. 1943

Age periods	Male	Female	Total
Under five years.....	40,704	39,132	79,836
Five to nine years.....	41,992	40,925	82,917
Ten to fourteen years.....	45,326	43,486	89,172
Fifteen to nineteen years.....	45,915	44,310	90,225
Twenty to twenty-nine years.....	76,616	71,427	148,043
Thirty to thirty-nine years.....	56,300	49,358	105,658
Forty to forty-nine years.....	48,326	40,546	88,872
Fifty to fifty-nine years.....	50,681	34,144	84,825
*Sixty to sixty-nine years.....	29,226	18,873	48,099
Seventy to seventy-nine years.....	10,889	8,034	18,923
Eighty years and over.....	2,806	2,616	5,422
Unknown.....	4	4	8
Total.....	448,785	393,215	842,000

DOMINION TABLES

The Dominion Bureau of Statistics have been supplied with transcripts of all birth, marriage and death records. A number of the tables in this report were prepared from these transcripts, by the Demography Branch of the Dominion Bureau of Statistics at Ottawa, and the tables are the same as those published in their annual report. The tables showing the rates for all Provinces, with the exception of Saskatchewan are preliminary and were taken from the Preliminary Annual Report, Vital Statistics of Canada, 1943.

These figures indicate this province as having the third lowest birth rate, the second lowest marriage rate, and the lowest death rate in the Dominion.

TABLE 4.—ESTIMATED POPULATION AS AT JUNE 2, 1943

Canada.....	11,795,000	Ontario.....	3,917,000
Prince Edward Island.....	91,000	Manitoba.....	726,000
Nova Scotia.....	607,000	Saskatchewan.....	842,000
New Brunswick.....	463,000	Alberta.....	792,000
Quebec.....	3,457,000	British Columbia.....	900,000

BIRTHS

The number of living births registered in 1943 was 18,504. This shows an increase of 315 over 1942 this figure is exclusive of stillbirths.

The birth rate for the province was 22.0 per 1,000, this rate being slightly higher than 1942. The percentage of births attended by physician was 85.6 during 1943, this being the highest percentage ever before recorded, the same can be said for births attended by nurse the 2.6 percent. being the highest recorded, while births having no physician or nurse in attendance reached the lowest point of 11.8.

DIVORCES

During 1943 a total of 178 returns of divorce and annulments were filed with the Registrar General, a decrease of 31 over the 1942 total of 209. Of this total of 178, 3 of these were annulments, husband's were the plaintiffs in 43% of the actions and 57% were the wives.

DEATHS

Deaths, exclusive of stillbirths, registered in 1943 numbered 6,654, an increase of 464 over the 1942 total of 6,190. The rate, however, still continues to be the lowest in the Dominion, as will be noted in Table 8.

OVERSEAS DEATHS

Arrangements have been made with the Department of National Defence whereby deaths of Saskatchewan residents, who die on active service overseas, are recorded with the Bureau of Vital Statistics in Regina. The following number of deaths have been registered for the year 1939 to 1943.

RATES PER 100,000
1921-1943

MORTALITY LEADERS

The following tables contain information concerning the most important causes of death, the total number of deaths registered from these causes was 4,111 or 61.8% of all deaths. Diseases of infants, such as premature birth, congenital debility, etc., are not included under this heading. As in previous years, heart diseases have the highest mortality rate.

CANCER

Cancer deaths registered in 1943 numbered, 779, compared with 756 for 1942. The rate for 1943 was 92.5, and 83.4 for 1942.

The rates for the Dominion as shown on table 9, give Saskatchewan the lowest death rate.

INFANT MORTALITY

Rates for infant mortality for all the provinces are given in Table 10. These rates are given without the decimal point, and with the exception of the rate for Saskatchewan, are; preliminary and subject to final revision. Deaths of Children under one year of age numbered 873 in 1943 as compared with 788 for 1942.

TABLE 91.—TOTAL DEATHS FROM ALL CAUSES

Int. List No.	Diseases	1934		1935		1936	
		No.	Rate	No.	Rate	No.	Rate
112	Asthma.....	49	5.3	22	2.4	33	3.5
113	Pulmonary emphysema.....	1	0.1	1	0.1	1	0.1
114	Other diseases of the respiratory system.....	5	0.5	15	1.6	10	1.1
115	Diseases of the buccal cavity and annexa, and of the pharynx and tonsils.....	29	3.1	30	3.2	47	5.0
116	Diseases of the oesophagus.....	1	0.1	1	0.1
117	Ulcer of the stomach or duodenum.....	41	4.4	65	7.0	48	5.2
118	Other diseases of the stomach.....	19	2.0	22	2.4	26	2.8
119	Diarrhoea and enteritis (under 2 years).....	99	10.6	82	8.8	123	13.2
120	Diarrhoea and enteritis (2 years and over).....	30	3.2	25	2.7	32	3.4
121	Appendicitis.....	157	17.1	162	17.4	161	17.3
122	Hernia, intestinal obstruction.....	82	8.8	87	9.3	77	8.3
123	Other diseases of the intestines.....	7	0.8	14	1.5	5	0.5
124	Cirrhosis of the liver.....	6	0.6	22	2.4	22	2.4
125	Other diseases of the liver.....	2	0.2	8	0.9	6	0.6
126	Biliary calculi.....	30	3.2	30	3.2	38	4.1
127	Other diseases of the gall-bladder and bile ducts.....	26	2.8	43	4.6	31	3.3
128	Diseases of the pancreas.....	7	0.8	4	0.4	5	0.5
129	Peritonitis without stated cause.....	17	1.8	8	0.9	6	0.6
130	Acute nephritis.....	19	2.0	19	2.0	19	2.0
131	Chronic nephritis.....	230	24.7	224	24.1	202	21.7
132	Nephritis unspecified (over 10 years).....	28	3.0	25	2.7	25	2.7
133	Other diseases of the kidneys and ureters.....	19	2.0	19	2.0	14	1.5
134	Calculi of the urinary passages.....	7	0.8	2	0.2	12	1.3
135	Diseases of the urinary bladder.....	6	0.6	6	0.6	11	1.2
136	Diseases of the urethra, urinary abscess, etc.....	3	0.3	1	0.1	2	0.2
137	Diseases of the prostate.....	57	6.1	73	7.8	67	7.2
138	Diseases of the male genital organs (non-venereal).....	2	0.2	4	0.4	3	0.3
139	Diseases of the female genital organs (non- venereal).....	9	1.0	13	1.4	16	1.7
140-150	Diseases of pregnancy, childbirth and the puerperal state.....	86	9.2	80	8.6	86	9.2
151	Carbuncle and furuncle.....	2	0.2	2	0.2	2	0.2
152	Phlegmon and acute abscesses.....	9	1.0	10	1.1	8	0.9
153	Other diseases of the skin and cellular tissue.....	12	1.3	5	0.5	5	0.5
154-156	Diseases of the bones and organs of movement.....	13	1.4	10	1.1	12	1.3
157	Congenital malformations.....	95	10.2	104	11.2	89	9.6
158	Congenital debility.....	88	9.4	83	8.9	53	5.7
159	Premature birth.....	286	30.7	288	30.9	275	29.5
160	Injury at birth.....	76	8.2	71	7.6	48	5.2
161	Other diseases peculiar to the first year of life.....	96	10.3	73	7.8	76	8.2
162	Senility.....	129	13.8	129	13.9	123	13.2
163-164	Suicides.....	105	11.3	99	10.6	88	9.5
165-168	Homicides.....	11	1.2	16	1.7	13	1.4
169	*Railway accidents (excluding motor vehicles).....	16	1.7	20	2.1	26	2.8
170	*Motor vehicle accidents.....	30	3.2	40	4.3	47	5.0
171	*Street-car and other road transport accidents.....	29	3.1	18	1.9	34	3.6
172	*Water transport accidents.....	4	0.4	3	0.3	8	0.9
173	*Air transport accidents.....	1	0.1	3	0.3	1	0.1
174	*Accidents in mines and quarries.....	3	0.3	2	0.2	2	0.2
175	*Agricultural and forestry accidents.....	*	*	*	*	*	*
176	*Other accidents involving machinery.....	16	1.7	20	2.1	26	2.8
177	Food poisoning.....	3	0.3	1	0.1
178	Accidental absorption of poisonous gas.....	5	0.5	10	1.1	8	0.9
179	Acute accidental poisoning by solids or liquids.....	15	1.6	10	1.1	11	1.2
180	Conflagration.....	17	1.8	16	1.7	11	1.2
181	Accidental burns (conflagration excepted).....	32	3.4	30	3.2	31	3.3
182	Accidental mechanical suffocation.....	10	1.1	15	1.6	13	1.4
183	Accidental drowning.....	41	4.4	37	4.0	46	4.9
184	Accidental injury by firearms.....	15	1.6	14	1.5	10	1.1
185	Accidental injury by cutting or piercing instruments.....	7	0.8	8	0.9	6	0.6
186	Accidental injury by fall or crushing.....	123	13.2	122	13.1	164	17.6
187	Cataclysm.....	3	0.3
188	Injury by animals.....	13	1.4	18	1.9	24	2.6
189	Hunger or thirst.....	2	0.2
190	Excessive cold.....	10	1.1	15	1.6	6	0.6
191	Excessive heat.....	2	0.2	5	0.5	13	1.4
192	Lightning.....	5	0.5	2	0.2	4	0.4
193	Accidents due to electric currents.....	3	0.3
194	Attack by venomous animals (non-occupational).....	2	0.2
195	Other accidents.....	11	1.2	18	1.9	13	1.4
196	Deaths of persons in military service during operations of war.....
197	Deaths of civilians due to operations of war.....
198	Legal executions.....
199	Sudden death.....	34	3.6	23	2.5	11	1.2
200	Ill-defined and unknown causes.....	31	3.3	26	2.8	20	2.1
